255/70R22.5 Goodyear G104 RST

Hydraulic System Power Source:
6.5hp Honda Engine

Paint Color: Black is Standard
Can match most colors

Options: Black Poly Fenders

The Express Tandem Axle NitroStinger uses Nitrogen over Oil Accumulators in its fully self-contained hydraulic loading system. It also has a Single Point Air Ride Suspension. These allow the Tandem Axle NitroStinger to maintain a constant load on both stinger axles over virtually any terrain. The axles have the capability of maintaining their load through over 2 feet of travel. In addition, the hydraulic system can be used to lift the NitroStinger axle off the ground for backing up.
